2018-2019 WI Chapter Officers:

President Elect:
Elier Aguilera

Vice President:
Craig Everson

Treasurer:
Jake Boulware

Secretary :
Joel Dickinson

Chapter President's Message:

We are close to wrapping up the 2018-2019 ASSP year. Our last Technical Meeting is on May 23rd at St. Johns on the Lake, hosted by VJS Construction. From there we move on to the annual Golf Outing on Tuesday June 25th at Hawk's View in Lake Geneva. If you have not yet signed up your foursome, do so now before it's too late! We also accept all group sizes and single golfers to register. We will pair you up with others. The golf outing concludes our ASSP year. We also have our annual planning meeting for the coming year that day. If you are interested, or know somebody that might be interested in hosting a technical meeting please let me, or one of the other board members know. It has been a pleasure serving as President of the Wisconsin Chapter. We have a lot of great members willing to get involved that makes serving voluntary board positions all the easier. I will continue to serve on the board as a voting member in the coming years, and will continue to participate in technical meetings and other ASSP events. Elier Aguilera, President Elect, will do great in his President's role. I wish him and the rest of the board success going forward. Thank you again to all members of the ASSP Wisconsin Chapter.

WI Chapter President for 2018-2019:

Corey Vickers
Safety Manager

ASSP Foundation

Since 1990, the ASSP Foundation has awarded more than \$3 million in scholarships and professional education grants to students beginning their studies in occupational safety and professionals seeking to continue their education. We offer nearly 150 awards each year ranging from \$500 to \$15,000 each. More than 1,300 safety students and professionals have advanced their careers, thanks to the generosity of the safety community.

Applications for both scholarships and grants are accepted online from September 1 through December 1 each year. Only a single application must be filled out for either program to be eligible for all available awards. If selected for an award, you will be matched with one based on the criteria set forth by the fund's donor. Scholarship and grant applicants will be notified in April as to the status of their application. Funds are disbursed shortly afterwards for scholarships, or upon receiving documentation of professional education for grants. Sign up at <https://www.assp.org/students/scholarships>.

Through your generosity, the American Society of Safety Professionals Foundation raised more than \$640,000 for those entering and working within the safety profession.

SCHOLARSHIPS

\$349,500
112 awards
90 individuals
43 universities

DEGREE TYPE
61% Bachelors
21% Masters
15% Ph.D.
3% Associates

MILITARY AWARDS
\$94K
39% Airforce
15% Army
15% Marines
15% Navy
8% Coast Guard
8% National Guard

GRANTS

\$28,425
27 awards
27 individuals

GRANT TYPE
59% Certification
30% Conference or Seminar

TOGETHER WE GAVE

\$377,925 scholarship & grant funds

50% of recipients
are women

8 NEW AWARDS

ACIG Scholarship (\$2,500)

Election Results

Wisconsin Chapter 2019-2020 Officer Election Results

Thank you for casting your vote for our 2019-2020 Secretary position! We are pleased to announce that Lizzy Polheber has won the election for the 2019-2020 Wisconsin Chapter Secretary and will take office July 1, 2019.

Congratulations Lizzy!

Lizzy Polheber

Elizabeth (Lizzy) Polheber has been in the construction industry for four years. Lizzy serves as a Safety Engineer for VJS Construction Services and works in tandem with VJS' Safety Director to ensure all safety requirements are carried out throughout the duration of all of VJS' projects. In this role, Lizzy has implemented improved health and safety standards that have elevated the level of safety within the company.

Creating Safer Workplaces for Young People

Summer Work Safety

A summer job is an exciting time for a young person. From earning money to taking on more responsibilities and learning new skills – it is an invaluable experience. That experience, however, carries an increased risk of being injured. Workers age 15 to 19 suffer [nearly twice the rate](#) of workplace injuries as workers over age 24. In addition, workers between the age 15 and 25 experience a workplace injury [every nine minutes](#) and a workplace fatality at a rate of [once per day](#).

A new collaborative campaign, [My Safe Summer Job](#), aims to educate young workers, parents, employers, supervisors and teachers about the importance of workplace safety and how to avoid hazards on the job. The campaign highlights five key elements of creating safe workplaces for young people.

1. **Workers' Rights.** At the [federal](#) and [state](#) level, protections specifically address the safety and well-being of young workers. Employers and workers should familiarize themselves with these requirements to develop a comprehensive understanding of the types of jobs available to different age groups, the number of hours they can work and their minimum wage.
2. **Hazard Identification.** Workers of any age must be familiar with the hazards present in their workplaces and how to avoid them. Since statistics indicate that young workers are more vulnerable to injury, hazard identification takes on added importance. The campaign website provides [resources](#) on common hazards young people face in the workplace and how they can be avoided.
3. **Raising Voices.** It's important for employers and supervisors to foster a culture in which workers, particularly young workers, feel comfortable bringing safety

Newsletter vol. 23, issue 1 (May 2019)

hazards to the attention of their supervisor. Workers should also not be afraid to ask questions about how to operate properly so that they and their co-workers stay safe.

4. **Preventing Injuries.** While young workers have a higher probability of workplace injuries, those injuries are largely preventable. By teaching young people to be aware of their surroundings and educating them on how to perform their jobs safely, employers and supervisors can work to create safer work environments and minimize workplace injuries.
5. **The Importance of Teamwork.** Safe workplaces take commitment and dedication from every employee across the operation. By showing employees that they care and are actively invested in worker safety, employers and supervisors can create a culture in which workers actively look out for each other's safety and well-being. Subsequently, this helps mitigate hazards and create safer workplaces.

We are proud to participate in this campaign with organizations including [OSHA](#), [NIOSH](#) and [CPWR](#) to educate workers, employers and parents on the risks faced by young people in the workplace.

LOTO Update

OSHA Requests Information on Possible Updates to the Lockout/Tagout Standard

OSHA is seeking information on a possible update to the [Control of Hazardous Energy \[Lockout/Tagout \(LOTO\)\] standard](#). Specifically, the agency is interested in comments on the use of control circuit-type devices to isolate energy, as well as evolving technology for robotics.

OSHA wants to learn how employers use control circuit-type devices, including information about the types of circuitry and safety procedures being used; limitations of their use to determine under what conditions control circuit-type devices could be used safely; new risks of worker exposure to hazardous energy as a result of increased interaction with robots; and whether the agency should change the LOTO standard to address these new risks.

The current LOTO standard was published in 1989. It requires that all sources of energy be controlled during servicing and maintenance of machines and equipment using an energy-isolating device. The standard specifies that control circuit-type devices cannot be used as energy-isolating devices, but technological advances may have improved the safety of these devices.

[ANSI/ASSP Z244.1-2016, The Control of Hazardous Energy: Lockout, Tagout and Alternative Methods](#), includes information on these devices as a alternative method for preventing the release of hazardous energy. Annex S of Z244 discusses application of the standard in the semiconductor industry. "When isolation of the hazardous energy would prohibit the completion of certain tasks, using alternative methods is an allowed means of protecting the workers. In these special cases, the use of robust circuit control designs can provide a highly reliable engineered solution to control these hazardous energies." It also contains guidance on design strategies to address control circuit reliability.

Comments on OSHA's request are due by Aug. 18, 2019, via the [federal e-Rulemaking portal](#).

2019 Risk, Health, And Safety For All

Please join us for the inaugural Risk, Health, And Safety For All conference held at the luxurious Potawatomi Hotel& Casino. The conference is a collaboration of multiple local, state, and national groups who saw a need for a conference in Wisconsin with innovative speakers at affordable attendance costs. The conference will truly embody the phrase "For All".

There will be a little bit of everything from each category of risk, health, and safety. Topics covered will range for an intended audience of seasoned professionals to intended audiences of hourly workers. Multiple tracks of speakers will be speaking in a breakout style format, allowing for each attendee to pick only the topics that are of interest.

Who Should Attend: Anyone who has an interest in the topics of risk, health, and safety in the workplace. **NOTE:** Register now to secure your spot – This conference is limited to the first 300 applicants!

Cost of Attendance:

Attendees
\$145 for 2 days
Students
\$30 for 2 days

Call for Speakers: If interested in submitting to speak at the conference, please email rhsforall@gmail.com. Please include your contact information, proposed topic, and a brief description of the topic.

Additional Information: Further information will be coming shortly in regard to conference agenda, speaker lineup and more.

Questions: For any additional questions please email rhsforall@gmail.com.

Conference
